Podiatry services resume in La Ronge

The Mamawetan Churchill River Health Region is pleased to announce the resumption of podiatry services.

Dr. Axel Rohrmann will travel from Regina to provide services in La Ronge for three days each month.

“Our clients will benefit from Dr. Rohrmann’s experience, and, in particular, his professional interest in the management of foot conditions for those with diabetes,” said Andrew McLetchie, Director of Integrated Health Services for the health region.

Dr. Rohrmann was previously the clinical head podiatrist with the Regina Qu’appelle Health Region, and currently maintains a private practice. He will work closely with the region’s home care staff, who can be reached at 425-4829.

The region has been providing limited foot care services since the passing of Dr. Brian Brodie in November, 2010.
