What to do if you find a discarded needle

As the snow melts, you may find discarded needles on the ground. Remember that discarded needles can cause injury and spread disease. Here's what to do if you find a discarded needle in the La Ronge area:

- Children should tell an adult immediately. They should **not** touch the needle.
- An adult should pick the needle up by the end that is not sharp, and place it in a strong container with a lid.
- Drop the container off at the Drop Box in Patterson Park or bring it to the La Ronge Health Centre.
- If you need help, call the Fire Department at 911.
